

What is ISO 27001?

ISO 27001 Information Security Management System standard provides an excellent framework for those developing or enhancing their organisation's information security needs and helps to proactively identify, manage and reduce the range of threats to which information is regularly subjected.

Key terms related to ISO 27001

Information is an asset that needs to be protected. The characteristics that require protection include Confidentiality, Integrity and Availability.

Confidentiality: Ensuring that information is accessible only to those authorized to have access

Integrity: Safeguarding the accuracy and completeness of information and processing methods

Availability: Ensuring that authorized users have access to information and associated assets when required.

ISO 27001 provides a way to manage security as an integrated process ensures that gaps are recognized; risks are identified and appropriately controlled. In essence, it provides a roadmap that allows a coherent approach to security management.

Benefits of ISO 27001 implementation:

All organizations, large and small, need to protect their private information from hackers, industrial espionage, and indiscrete use and dissemination.

ISO 27001 Certification provides many tangible benefits:

- Ensures that all risks are recognized
- Risks are systematically evaluated and addressed to minimize potential exposures.
- Ensures security practices conform to industry best practices.
- Ensures Confidentiality, Integrity and Availability of Information and Assets.
- A valuable framework for resolving security issues
- Enhancement of client confidence
- Enhancement of security awareness within an organisation
- Can often be a deciding differentiator between competing organisations

Morison UAE Consulting

Morison UAE Consulting assists organisations to achieve ISO 27001 certification through its team of security specialists supporting the client in implementation of ISMS. Morison UAE Consulting also runs regular ISO 27001 training courses.

Our ISO 27001 service includes:

- GAP Analysis
- Training
- Risk Assessment
- Formulation of policies, procedures, checklists and controls.
- Internal audits
- Certification Assistance
- Post-Certification Assistance

GAP Analysis

GAP Analysis includes a detailed report on comprehensive assessment of existing security processes that are being followed in the area of information security not limited to technical security, physical security, information management and contractual obligation against ISO 27001 standard and controls required to attain compliance.

Risk Assessment

Risk Assessment will identify the various information security risks involved in your business processes and the report will detail security control measures for the same.

Training

Our training involves three levels of training depending on the target audience

- Overview of ISO 27001 for senior management and objective setting
- Detailed training on ISO 27001 requirements and internal audit for core team involved in implementation, maintenance and internal audit
- Awareness training at user level for all employees

Formulation of Policies and Procedures

Our specialists will define objectives, policies and procedures in discussions with client's team. The information security management system will be developed to meet the requirements of ISO 27001 and business requirements of client. The system developed for the client shall meet the requirements of third party certification body for successful certification.

Internal Audit

Internal audit shall ensure compliance of the existing IT environment and its management procedures to the requirements of ISO 27001

Certification Assistance

Morison UAE Consulting will provide assistance in selecting the Third party certification body and guide you through the process of gaining certification and ensure close involvement during the all stages of certification process.

Post-Certification Assistance

We also support you to maintain the certification by conducting internal audits at pre-determined frequency.

Why Morison UAE Consulting

- We understand the requirements of Middle East clients
- Have specialists with rich experience in IT and risk management
- Have a research centre that continuously adopts and deploys best practices
- Professional approach to client engagements
- Support of Morison international network
